9th December 2025

Dear Sir/Madam,

I've been working with Bartlomiej and his team in a partnership that has been in place between us since 2017, and I would like to wholeheartedly recommend Webtechnika sp. z o.o.. Over this time, we have had the pleasure of using their services in the area of software development and IT solutions and at all times we have been extremely satisfied with their professionalism, commitment and the care they brought to their work. Below, I give a short description of two projects with VISION where Webtechnika demonstrated their professionalism, commitment, and an excellent command of technology:

### **Creation of an Advanced Energy Company Management System:**

In collaboration with Webtechnika, we developed an advanced system for managing three core functions of an energy company startup, namely: customer billing, CRM integration, and Industry Messaging. As part of this work Webtechnika successfully implemented six microservices using the Python language and the Django framework. The entire infrastructure was hosted on the AWS platform. This project was particularly demanding due to the very large amounts of data that were processed each month, for example billing over 250,000 customers monthly for their electricity usage. Webtechnika's expertise in programming, scaling systems and databases, and in AWS infrastructure configuration and management was impressive. Thanks to their dedication and knowledge, we were able to create a system that significantly improved the efficiency of the energy company.

### **COVID Pandemic - High-volume and Efficient Online Supply of Antigen Test Kits for the HSE (Ireland's national health service) and the Irish Ministry of Health:**

Another project we entrusted to Webtechnika was the creation of a Web application that allowed residents in Ireland to order Antigen Test Kits and have the kits delivered to them the next day. This facility played an incredibly important role in Ireland's response to the COVID pandemic, and in the easing of the lockdowns. Webtechnika demonstrated not only an excellent understanding of technology but also a deep grasp of our needs and requirements, including the pace at which we had to move. As a result, we were able to create tools that were user-friendly while meeting all the safety and data accessibility criteria of the Ministry of Health. Noteworthy in this project was the fact that Webtechnika quickly repurposed the Web App into the Irish language (Gaelic language), alongside English, which was an important political and legal consideration for the Ministry of Health. This project was crucial in the context of the fight against the COVID-19 pandemic, and Webtechnika was invaluable in ensuring the smooth operation of these systems.

In both these projects Webtechnika displayed exceptional professionalism, timeliness, flexibility, commitment and care. We value our long-standing collaboration with Webtechnika. The trust we place in them. is the result of their reliability, the quality of their top-notch solution and their readiness to take on the many challenges we threw at them.

I am confident that Webtechnika is a partner worth recommending, and their skills and dedication will guarantee success in the projects they undertake. We wholeheartedly recommend them and know that our collaboration will continue in the future.

Yours Sincerely,

Gerald Adams  
Group Director
